

2016 'ICT by the Sea' Conference

4th - 6th October, 2016

Rendezvous Grand, Scarborough

This year, you have the opportunity to be a part of one of the most complete demonstrations attempted within a Conference setting of ICT deployment to a school. It will be educational, it will be daunting and it'll give you a close look at decision making in practice for ICT deployments in schools.

Hugo van Niekerk from Mazenod College with his wealth of ICT engineering experience will take attendees at his sessions through a journey; as he designs builds and then benchmarks a complete school system prior to extending it to the cloud. There will be plenty of detailed technical information to support decisions, improve deployment, implement management and incorporation of the cloud to extend on premise functions.

If you're involved in decisions making, technical support or want to understand ICT better for your teaching, this will be an all day exercise split into four sessions where you can pick up tips and tricks from Hugo.

With plenty of other sessions running concurrently you may not want to be involved with the whole day but I can guarantee you will learn something from Hugo if you want come and be involved.

To purchase either a full Conference or just Day 2 ticket go to
